## Projects

### LEAD MANAGEMENT SYSTEM

VELS UNIVERSITY

• A lead management system is vital for companies to generate, track ,and respond to leads from various sources. It can function as a standalone application or be integrated with others, enabling creation and maintenance of leads, opportunities, contacts, and accounts. Additionally, it serves as a performance tracker for marketing teams, offering insights into lead acquisition, conversions, and product sales to enhance organizational strategy and sales team efficiency.

- **Front-End/Back-End** : HTML CSS JS /Bootstrap/Java.

### MADADS (Digital Marketing Website)

VIRTUAL INDIA

•The project involves developing a comprehensive single-page website focusing on digital marketing services. This includes social media management, content creation, advertisements, and web development. The website aims to showcase the range of services offered, emphasizing expertise in maximizing online presence and engagement for clients across various platforms.

- **Front-End/Back-End** :HTML CSS JS /Formspree.

### DRIVEZ(Driving School Software Overview)

VIRTUAL INDIA

•Drive-Z is a comprehensive driving school software designed to streamline administrative tasks and enhance the learning experience. Our website showcases its array of features, including intuitive scheduling, progress tracking, instructor management, payment processing, and interactive learning modules. With Drive-Z, driving schools can efficiently manage their operations and provide students with a seamless journey toward obtaining their driver's license.

- **Front-End/Back-End** :HTML CSS JS /Bootstrap.

## VIRTUAL INDIA (Accounting Website)

VIRTUAL INDIA

•Developed a website showcasing the comprehensive accounting services provided by the firm, enhancing client engagement and visibility of financial solutions.

• **Front-End/Back-End** :HTML CSS JS /Bootstrap.
